

Screw Plug Immersion Heaters

Screw Plug Immersion Heaters consist of tubular elements welded or brazed into a threaded screw plug which can then be inserted into a threaded opening in a tank wall or through a mating full or half coupling.

Design Features

- * Stainless Steel, Brass or Steel Screw Plugs
- * Four Standard Screw Plug Sizes—1", 1-1/4", 2", 2-1/2"
- * Recompacted element bends restore insulation resistance after forming
- * Thermowell for optional bulb & capillary thermostat, RTD or T/C probe
- * Corrosion-Resistant electrical wiring hardware
- * Four standard sheath materials — Copper, Steel, 316 Stainless Steel and Incoloy®800
- * NEMA 1 round terminal housing
- * Silicone resin element seal standard

For Type TSP Screw Plug Heaters used in UL Recognized Oil Immersion Heating Applications

- The heated oil temperature cannot exceed 257°F (125°C)
- Steel sheath elements are limited to 60 watts/in²
- Steel or Stainless Steel mounting plugs (no Brass)
- Heaters with tapered threads (NPT, BSPT, or Metric) are UL rated for 60 psig maximum

Contact Tempco for other application specific UL file information.

Optional Features

- * NEMA 4 Moisture-Proof and/or NEMA 7 Explosion-Resistant terminal housings
- * Integral Single or Double Pole Thermostats in various temperature ranges to suit the application
- * Passivation, Electropolishing or Bright Annealing surface treatments available for Stainless Steel & Incoloy® elements
- * Type J & K Thermocouples or RTD probes for sensing process temperatures, or over-temperature protection when attached to the sheath
- * Special sheath materials
- * Special straight bulkhead or European thread fittings

Tempco Screw Plug Immersion Heaters are UL recognized and CSA certified in many design variations. The UL File Numbers are E90771 (CCN ÜBJY2/8) for heaters not containing a thermostat and E234452 (CCN KSXF2) for heaters used in water based solutions that include a thermostat. Tempco's equivalent CSA file number is 043099. Screw Plug heating elements and assemblies with thermostats have additionally been evaluated to UL574 (File Number MP4154) under CCN MDST2/8 for oil heating applications.

If you require UL, CSA, or other NRTL agency approvals, please specify when ordering.

Checklist — Selecting the Proper Screw Plug Heater

☑ Determine a Safe and Efficient Element Watt Density

Element Watt Density is the wattage dissipated per square inch of the element sheath surface and is calculated with the following formula.

$$\text{Watt Density} = \frac{\text{element wattage}}{\pi \times \text{element dia.} \times \text{element heated length}}$$

For a particular application, element watt density will govern element sheath temperature.

Factors to consider when choosing a suitable watt density are:

1. Many materials are heat sensitive and can decompose or be damaged if the element is running too hot.
2. Air and other gases that are poor conductors of heat require watt densities matched to the velocity of the gas flow to prevent element overheating.
3. When heating hard water and cleaning solutions mineral deposits can build up on the element sheath, acting as a heat insulator and raising the internal element temperature. If these deposits cannot be periodically removed, use a lower watt density element to increase heater life expectancy.

☑ Select the Element Sheath Material

Sheath Material Selection

CORROSION. In addition to selecting a sheath material that is compatible with the heated medium, other factors that affect corrosion need to be considered.

1. The temperature of the corrodent. As temperature increases the degree of corrosion increases. Also remember that usually the element temperature is higher than the material it is heating.
2. The degree of aeration to which a corrodent is exposed. Stagnant conditions can deprive the stainless steels of oxygen, which is required to maintain their corrosion resistant surface.
3. Velocity of the corrodent. Increased velocity can increase the corrosion rate.

Note: See pages 16-12 through 16-20 for the recommended sheath materials for many immersion heating applications. If you are purchasing the material you are heating, check with the supplier for their recommendations.

Typical Applications

Copper Sheath—Process water, water with very weak chemical solutions, potable water, hot water storage for washrooms, showers, cleaning and rinsing parts, for freeze protection of cooling towers and sprinkler systems and other aqueous solutions not corrosive to copper sheath. Sheath temperatures to 350°F (177°C).

Incoloy® Sheath—Weak chemical solutions, oils, tar, caustic soda, detergent, alkaline solutions, molten salts, demineralized, deionized or pure water (sheath passivation is recommended), and other aqueous solutions not corrosive to Incoloy® sheath. Air, gas mixtures and superheated steam. Sheath temperatures to 1600°F (871°C).

Steel Sheath—Fluid heat transfer media, tar, high to low viscosity petroleum oils, asphalt, wax, paraffin, degreasing solvents, alcohol, molten salt, and other solutions not corrosive to steel sheath. Sheath temperatures to 750°F (399°C).

Surface Treatments for Stainless Steel and Incoloy® Elements and other Wetted Parts to Improve Corrosion Resistance

Screw Plug Immersion Heater surfaces in contact with the material being heated can be passivated or electro-polished to improve their resistance to corrosion.

Passivation removes surface contamination, usually iron, so that the optimum corrosion resistance of the stainless steel is maintained. Surface contamination would come from the small amount of steel that may be worn off a tool during the manufacturing process. Passivating is accomplished by dipping the heater in a warm solution of nitric acid.

Electro-Polishing is an electrochemical process that removes surface imperfections and contaminants, enhancing the corrosion resisting ability of the stainless steels. The resultant surface is clean, smooth and bright. Many medical and food applications require this finish.

Screw Plug Immersion Heaters

Checklist — Selecting the Proper Screw Plug Heater, *continued*

Select the Terminal Housing Type

Standard catalog screw plug immersion heaters are supplied with the **Type 1N** general purpose (NEMA 1) terminal housing with a single Dual 1/2-3/4 conduit knockout as shown on page 11-2. Additional housings with and without a thermostat include:

Moisture Resistant (NEMA 4)

Explosion Resistant (NEMA 7)

Moisture/Explosion Resistant (NEMA 4/7)

If the housings on this page do not meet the size, construction or other criteria of your application, consult Tempco with your requirements.

Explosion resistant terminal housings are intended to provide containment of an explosion in the enclosure only. No portion of the heater assembly outside the enclosure is covered under this NEMA rating. Abnormal use of a heater which results in excessive temperature can create hazardous conditions such as a fire. Never perform any type of service nor remove the housing cover prior to disconnecting all electrical power to the heater.

Standard NEMA 1 Housing Dimensions

TYPE 1N

(for no thermostat)

for 1", 1-1/4", 2" and 2-1/2"
Screw Plug Heaters

TYPE 1T

(for a single pole thermostat)

for 1", 1-1/4", 2" and 2-1/2"
Screw Plug Heaters

TYPE 6T

(for a double pole thermostat)

for 1", 1-1/4", 2" and 2-1/2"
Screw Plug Heaters

Standard NEMA 4 and/or 7 Housing Dimensions

NEMA 4 rating requires the use of the cover gasket.

TYPE 2N

(for no thermostat)

for 1", 1-1/4", 2" and 2-1/2"
Screw Plug Heaters

TYPE 2T

(for use with a single pole thermostat)

for 1" and 1-1/4" Screw Plug Heaters

TYPE 3T

(for use with a double pole thermostat)

for 2" and 2-1/2" Screw Plug Heaters

Screw Plug Immersion Heaters

Alternate NEMA 1 Housing

Type 3N

(for no thermostat)

for 1", 1-1/4", 2" and 2-1/2" Screw Plug Heaters

Alternate NEMA 4 Housing

TYPE 4N

(for no thermostat)

for 1", 1-1/4", 2" and 2-1/2" Screw Plug Heaters

Alternate NEMA 4 Housing

TYPE 4T

(for a single pole thermostat)

for 1" and 1-1/4" Screw Plug Heaters

Alternate NEMA 4 Housing

TYPE 5T

(for a single or double pole thermostat)

for 2" and 2-1/2" Screw Plug Heaters

Wiring Diagrams — Screw Plug Heaters with Two Elements

Note: Dual-Voltage heaters are factory wired for the higher voltage (series connection) unless otherwise specified. Easily rewired for lower voltage operation (parallel connection).

Wiring Diagrams — Screw Plug Heaters with Three Elements

Three Element
Crisscross Pattern
2" NPT Plugs
(Optional on 2-1/2" NPT Plugs)

Three Element
Parallel Pattern
2-1/2" NPT Plugs

NOTE: Standard screw plug immersion heaters with three elements, factory wired for three-phase delta, can be rewired for single-phase operation with no wattage change. Wattage can be reduced to one-third of the designed wattage by switching from three-phase delta to wye connection.

Heaters wired for three-phase wye should not be changed to single-phase or three-phase delta connection, since this will increase wattage and watt density on the elements by three times the original designed wattage, causing premature heater failure.

Bulb & Capillary Thermostats

Thermostat Styles and Selection

Construction Characteristics

This type of control operates by expansion and contraction of a liquid in response to temperature change. Liquid contained within the sensing bulb and capillary

flexes a diaphragm, causing the opening and closing of a snap-action switch. For heating applications the contacts are normally closed and open on temperature rise.

Style A Single-Pole Thermostat

- * General purpose thermostat recommended for most applications.
- * Capable of controlling loads from 120V/30A up to 480V/20A

Style B Double-Pole Thermostat

- * Recommended for directly controlling high wattage loads due to its heavy duty contacts.
- * Capable of controlling loads up to 30 Amps at 277 VAC and 10 Amps at 480 VAC

Thermostat Electrical Ratings: Normally Closed Contacts, Open on Temperature Rise – Adjustable

- Notes:**
1. Knobs, Bezels and Pilot Lamps are optional and must be ordered separately from the thermostat.
 2. Knob **TST-104-119** graduated in °C (15-120) is available as an alternate for the standard TST-104-103 knob graduated in °F (60-250).
 3. For Thermostat Enclosures refer to page 11-9.

Thermostat Wiring Diagrams

Thermostat Style A (Single Pole—Single Throw)

Typical circuit when voltage and/or line current does not exceed thermostat ratings

1Ø or 3Ø circuit if line voltage and/or current exceeds thermostat rating

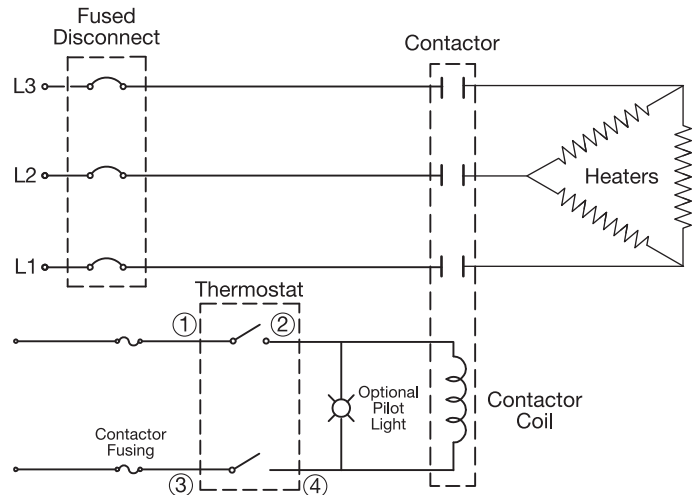

Thermostat Style B (Double Pole—Single Throw)

Typical circuit when voltage and/or line current does not exceed thermostat ratings

1Ø or 3Ø circuit if line voltage and/or current exceeds thermostat rating

Stock Thermostat Kits

Double-Pole Thermostat Kits include the following components:

Kit Number TSTR-1008 with Style B Thermostat	
TST-110-103	Thermostat with 100 to 550°F Range
TST-104-104	Knob
EHD-109-103	Pilot lamp
TST-111-101	Bezel

Kit Number TSTR-1009 with Style B Thermostat	
TST-110-102	Thermostat with 60 to 250°F Range
TST-104-103	Knob
EHD-109-103	Pilot lamp
TST-111-101	Bezel

Note: Double-Pole Thermostat Kits can also be installed separately from the heater in housing HSGR-1004 shown on page 11-9.

Bulb & Capillary Thermostats

Thermostat Styles and Selection

Style C Double-Pole Thermostat

- * Secondary high limit circuit with manual reset
- * High limit tracks 25°F above setpoint temperature
- * High limit latches open until manual reset is pushed in the event that temperature goes up to 25°F above setpoint
- * Capable of controlling loads up to 30 Amps at 277 VAC

Style D Single-Pole Thermostat

- * General purpose thermostat recommended for most applications
- * Capable of controlling loads up to 25 Amps at 240 VAC

Thermostat Electrical Ratings: Normally Closed Contacts, Open on Temperature Rise – Adjustable

NOTES:

- Knobs, Bezels and Pilot Lamps are optional and must be ordered separately from the thermostat.
- Knob TST-104-119 graduated in °C (15-120) is available as an alternate for the standard TST-104-103 knob graduated in °F (60-250).
- Knob TST-104-105 is a plain pointer knob, not calibrated for the range.
- Knob TST-104-102 is printed with 4 through 10, not calibrated for the range.
- For Thermostat Enclosures refer to page 11-9.

Thermostat Style C (Double Pole—Single Throw) with Reset

Typical circuit when voltage and/or line current does not exceed thermostat ratings

10 or 30 circuit if line voltage and/or current exceeds thermostat rating

Thermostat Wiring Diagrams

Thermostat Style D (Single Pole—Single Throw)

Typical circuit when voltage and/or line current does not exceed thermostat ratings

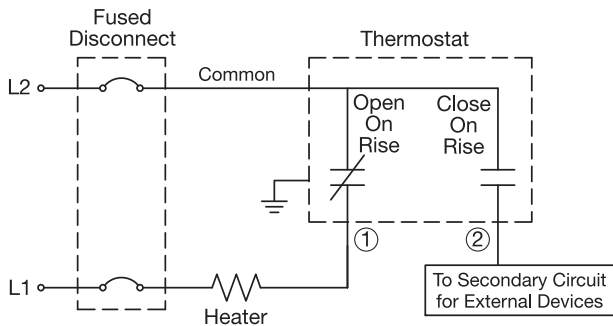

1Ø or 3Ø circuit if line voltage and/or current exceeds thermostat rating

Thermostat Style D (Single Pole—Double Throw)

Typical circuit when voltage and/or line current does not exceed thermostat ratings

1Ø or 3Ø circuit if line voltage and/or current exceeds thermostat rating

Stock Thermostat Enclosures

Thermostat Installation Warnings & Recommendations

1. Do not use the thermostat as a power switch. Use some other means of disconnecting power to the heater for servicing.
2. A thermostat is not a fail-safe device. Use an approved high temperature limit control and/or pressure limit control for safe operation.
3. Avoid kinking or bending the capillary tube too sharply as this will alter the calibration and/or render the thermostat inoperable.
4. Excess capillary tube should be coiled neatly in junction box.
5. The capillary tube must never touch the thermostat contacts as this will create an electrical short capable of harming personnel and/or equipment.

NEMA 1 Enclosure

For Single-Pole Thermostats
Size: 4-1/4"H × 3"W × 2"D
with 3/4" trade size knockout
Part Number: HSGR-1003

NEMA 1 Enclosure

For Double-Pole Thermostats
Size: 6-1/2"H × 3-3/4"W × 2-1/2"D
with 1/2" trade size knockout
Used with Thermostat kits TSTR-1008
and TSTR-1009 shown on page 11-7.
Part Number: HSGR-1004

Style F Temperature High Limit Switch with Manual Reset

Thermostat Electrical Ratings: High Limit – Manual Reset, Normally Closed Contacts, Open on Temperature Rise at Fixed Temperature

NOTES: F2 style has a side vertical mounting bracket instead of #8 tapped holes for mounting. Refer to IDP-119-104 for mounting details.

Hi-Limit Thermostat Style F (Single Pole—Single Throw)

- * General purpose high limit switch with manual reset
- * Once fixed trip point is reached, the high limit switch will remain open until the manual reset button is pushed

Thermowells (Stainless Steel or Plain Steel)

Thermowells provide protection for bulb and capillary sensors. They are supplied with a 1/2" NPT male thread for mounting and a 3/8" NPT internal thread that can be used with the stuffing box assembly to secure the capillary to the well. ID: 0.50", OD: 0.56" See pages 14-76 through 14-83 for other thermowell styles.

Stock Items Are Shown In **RED**

Immersed Length		Part Number	
in	mm	Steel	Stainless Steel
12	305	MPT-120-101	MPT-121-101
18	457	MPT-120-102	MPT-121-102
24	610	MPT-120-103	MPT-121-103
36	914	MPT-120-104	MPT-121-104

Stuffing Box Assembly

The Stuffing Box Assembly is used to seal the thermostat capillary when the sensing bulb (3/8" max. OD) is immersed directly in a liquid rather than in a thermowell. The Stuffing Box consists of six slotted washers used to compress a graphite packing into a 3/8" NPT male pipe thread fitting.

Assembly Instructions

Feed sensing bulb through hole in upper and lower fitting. Insert washers and packing into top cavity of lower fitting. Upper fitting then screws into lower fitting, creating the seal.

Part Number: TST-109-101

Standard (Non-Stock) and Stock Screw Plug Immersion Heaters

Stock Items Are Shown In **RED**

8 watts/in² (1.3 watts/cm²) — Typical Applications: Fuel Oils (Bunker C and Number 6)

* Steel Screw Plug

* Steel Sheath Heating Elements

* NEMA 1 Terminal Housing

See Page 11-16 for complete Ordering Information.

Standard (Non-Stock) and Stock Screw Plug Immersion Heaters

Stock Items Are Shown In **RED**

23 watts/in² (3.6 watts/cm²) — Typical Applications: Lightweight Oils • Degreasing Solutions • Heat Transfer Oils

* Steel Screw Plug

* Steel Sheath Heating Elements

* NEMA 1 Terminal Housing

NOTE: Dual-Voltage heaters are 1-Phase and are wired for the higher voltage unless otherwise specified.
Part Numbers followed by a ① are 3-Phase only. Other 3-Phase heaters are convertible to 1-Phase.

Ordering Information

Catalog Heaters

Screw Plug Immersion Heaters whose Part Numbers are in **RED** are in stock for immediate delivery.

Standard Non-Stock Part Numbers are stocked as sub-assemblies for 2-3 week delivery.

Custom Engineered/Manufactured Heaters

Understanding that an electric heater can be very application specific, for sizes and ratings not listed, **TEMPCO** will design and manufacture a Screw Plug Immersion Heater to meet your requirements.

Standard lead time is 4 weeks.

Please Specify the following:

- ☐ Wattage, Voltage and Phase
- ☐ Screw Plug Size and Material
- ☐ Element Sheath Material
- ☐ Element Watt Density
- ☐ Element Immersion Length
- ☐ Electrical Enclosure Type
- ☐ Thermostat— if required
- ☐ Optional Features

Standard (Non-Stock) Self-Contained Immersion Heaters

Design Features

This immersion heater is specifically designed for commercial dishwashers and sterilizing equipment. However, due to the unique construction characteristics of these heaters, they are readily adaptable for use in other water heating applications. The heating elements are prewired to a Definite Purpose contactor, thermostat and high limit cutout. The thermowell is located at the top of the element bundle for fast shut-off response, preventing overheating due to low water level conditions.

- * 2" NPT Brass screw plug
- * Three Incoloy® 800 tubular elements
- * Thermostat — 60°F (15°C) to 250°F (120°C) range
- * 350°F (177°C) Over-temperature cutout with manual reset
- * Internal Definite Purpose contactor with 120V holding coil
- * NEMA 4 moisture resistant housing
- * Silicone resin element seal standard

Optional Mounting Kit (Part Number KTT00281) — Clamping nut, flat washer and gasket for mounting heater in thin wall tanks with a 2-3/8" (60 mm) diameter opening.

Immersed Length		KW	Part Number					Approximate Net Weight

Standard lead time is 2 to 3 weeks.

Standard (Non-Stock) General Purpose Hot Water Tank Heaters

Design Features

- * 1"-11 1/2" NPSM Brass Plug with O-Ring gasket (NPT optional)
- * Incoloy® 800 Tubular Element
- * 10-32 plated screw terminals
- * 90°C epoxy seal standard
- * Optional ceramic terminal block for high temperature applications
