Plastics Processing Equipment utilizes numerous types of specially designed Cast-In Aluminum and/or Bronze Heaters. In addition to the typical and commonly used cylindrical cast-in heaters, complex geometric shapes are used extensively as well.

The following two pages provide you with a small overview of our manufacturing capabilities by illustrating some popular cast-in heater shapes and how they are used. Special designs can be made to your specifications. Consult Tempco with your requirements.

**Specialty Cast-In Aluminum and Bronze Heaters Used in Plastics Processing Equipment**

**Internal Ring Heater**

**Laminating Radial Edge Heater**

**“U” Shaped Heater**

**“L” Shape with Vent Clearance Hole**

**Platen for Plastic Welding Equipment**

**Semicircular Shaped Heater**

**Segmented Ring Heater**

**Flat Platen Heater**

**Internal Ring Heater**
