- 72" Insulated Lead Wire Length
  - White/Black for 250W and White/Red for 125W

**Clamping**

Screw operated clamping for the traditional style.

**Cam Operated Clamping**

Cam operated axial clamping allows tool room personnel to replace the heating element or the thermocouple of the gate bushing without having to remove the bushing from the mold. This can even be done in emergencies while the mold is still in the press, saving hours of downtime. The hex head cam is accessed from the front, parallel to the bushing’s shaft.
